See Also

[ourPkg-deprecated](#)

herNewFun *Her new function.*

Description

Her new function.

Usage

herNewFun(arg1, arg2)

Arguments

arg1 Her new first argument.
arg2 Her new second argument.

Value

Her new return value.

hisFun-deprecated *His function.*

Description

His function.

Usage

```
hisFun(arg1, arg2)
```

Arguments

arg1 His first argument.
arg2 His second argument.

Value

His return value.

See Also

[ourPkg-deprecated](#)

hisNewFun *His new function.*

Description

His new function.

Usage

```
hisNewFun(arg1, arg2)
```

Arguments

arg1 His new first argument.
arg2 His new second argument.

Value

His new return value.

myFun-deprecated *My function.*

Description

My function.

Usage

```
myFun(arg1, arg2)
```

Arguments

arg1 My first argument.
arg2 My second argument.

Value

My return value.

See Also

[ourPkg-deprecated](#)

myNewFun *My new function.*

Description

My new function.

Usage

```
myNewFun(arg1, arg2)
```

Arguments

arg1 My new first argument.
arg2 My new second argument.

Value

My new return value.

ourPkg-deprecated *Deprecated functions in package **ourPkg**.*

Description

The functions listed below are deprecated and will be defunct in the near future. When possible, alternative functions with similar functionality are also mentioned. Help pages for deprecated functions are available at `help("<function>-deprecated")`.
